We love gifts

Index

The offer shown
in the catalogue
is valid
**between 1.02.2024
and 31.01.2025**

Because of the limitation
of printing technology, colours
of each product can slightly differ
from the colours presented on
the photographs. The easurements
are approximate and cannot
be the reason to complain.
The manufacturer can change
technical parameters of the
products and is not responsible
for possible printing mistakes.
According to Civil Code catalogue
is not the offer. All the data
enclosed in that catalogue are
valid in the month of its printing
(January 2024r).

...you see it, you know it!

 The device features inductive charging for wireless charging.	 The product is equipped with RFID function.	 The product is made entirely or partly of natural cork.	 The product is made entirely or partially of recycled cotton.
 Fast charging function.	 The product was manufactured in the European Union.	 The product is made entirely or partly of natural bamboo.	 The product is made entirely or partially of recycled leather.
 Bluetooth and its version.	 The tightness of the product (liquid does not leak).	 The product is made entirely or partly of wood.	 The product is made entirely or partially of recycled paper.
 USB standard.	 Product Capacity.	 The product is made entirely or partially of hemp fibers.	 The product is made entirely or partially of upcycled paper.
 Device with AUX input.	 Approximate temperature holding time (given in hours).	 The product is made entirely or partially of coffee fiber.	 The product is made entirely or partially of recycled PLA.
 MicroSD card input.	 The product is free of harmful bisphenol A.	 The product is made entirely or partially of wheat straw.	 The product is made entirely or partially of recycled aluminum.
 The cable is not included with the device.	 UV marking around the item is possible.	 The product is made entirely or partly of glass.	 The product is made entirely or partially of recycled stainless steel.
 The product is covered with a pleasant to the touch rubberized coating.	 Approximate candle burning time.	 The product is made entirely or partially of stone paper.	 The product is made entirely or partially of recycled PU.
 Possibility of marking with illuminated logo effect.	 The product has thermal insulation layer.	 The product is made entirely or partly of natural leather.	 The product is made entirely or partially of recycled ABS plastic.
 Information about batteries that are required for product operation, but are NOT included with the device.	 Fabric weight.	 The product is made entirely or partially of recycled plastic.	
 Mirror effect marking is possible.	 Automatic umbrella opening.	 The product is made of paper, recycled of milk cartons.	
 Possibility of engraving around the item.	 The product has reflective elements.		
 Pen nib color.	 The product has a flashlight function.		
 Suggested size of laptop to fit in bag/backpack.	 Multifunctional device.

BLUE COLLECTION video.

Materials

In today's world, where a sustainable approach to consumption is becoming increasingly important, the selection of eco-friendly materials in the production of advertising gadgets is becoming a key element of our consumer responsibility. We will examine why the choice of eco-friendly raw materials is not only fashionable, but above all essential in minimizing environmental impact.

Bamboo

Bamboo is a truly fascinating and environmentally friendly raw material that is gaining popularity in the production of all sorts of items, including advertising gadgets. Bamboo is one of the fastest-growing plants in the world, which means that it can be quickly replanted and used to produce new items. It is worth remembering that it is a biodegradable raw material, which means that after the life cycle of a product, made of this material, it can decompose naturally, without negative impact on the environment. By choosing bamboo promotional gifts, companies not only promote their products, but also contribute to protecting the environment and promoting sustainability. This is an excellent way to show commitment to responsible production and consumption.

03089 / p. 62

19670 / p. 120

16230 / p. 213

20706 / p. 274

rPET

Products made entirely or partially from recycled plastic, derived from recycled PET bottles.

RPET uses existing plastic resources, reducing waste and the need to produce new plastic. In this catalog, in addition to traditional promotional gadgets made from RPET, you will also find NEW felt bags, sacks and backpacks made from 100% RPET.

Promotional gifts made from RPET are seen as more sustainable and environmentally friendly.

Coffee Fiber

Coffee Fiber is derived from recycling the husks and scraps that are generated during the roasting and grinding of coffee beans. This innovative approach allows the waste to be used to create new, useful products, while reducing the amount of waste generated by the coffee industry. By choosing coffee-fiber promotional gadgets, companies underscore their commitment to sustainable business practices. It's a great way to contribute to environmental protection and promote the idea of recycling.

19291 / p. 131

17790 / p. 162

17857 / p. 162

20337 / p. 267

Recycled cotton

Products made from recycled cotton are increasingly popular because they make efficient use of resources and reduce environmental impact. Recycled cotton can come from both the textile industry and the recovery of used clothing and cotton materials. Using recycled cotton helps reduce the need for new raw materials, reduce waste and reduce the negative environmental impact of the textile industry. It also often fosters the idea of a closed-loop economy, where products and materials are used, recycled and reused. Instead of ending up in landfills, they are given a second life in the form of MELANGE cotton bags, among others.

17711 / p. 158

17792 / p. 145

17893 / p. 160

Stone paper

Stone paper, also known as mineral paper, is a type of paper made primarily from minerals. It does not contain traditional wood fibers, which distinguishes it from conventional types of paper. What's more, the production of this type of paper reduces water consumption, which is another advantage in terms of sustainability. Stone paper is primarily used in the production of eco-friendly promotional gadgets, such as notepads and notebooks, which are not only practical, but also invariably remind us of the brand's commitment to protecting the planet.

17877 / p. 161

Paper made from milk cartons

Paper that was created from milk packaging. By recycling, cardboard paper becomes the material for creating our eco-friendly office gadgets. By using our MILK notebooks, you not only organize your daily tasks, but also take care of the planet. Earth-friendly notes? It's possible with MILK!

18013 / p. 171

17899 / p. 163

17897 / p. 163

Marking Techniques

LASER ENGRAVING

symbol: G0, G1, G2, G3, G4, G5

Engraving is characterised by extreme precision. Even the smallest element of a logo can be reproduced. This marking involves removing the top layer of the product, exposing its underlying texture.

We carry out engraving on products made of the following materials: metal, wood, glass, felt, leather, paper, plastic.

YouTube

YouTube

PAD PRINTING

symbol: N0, N1, N2, N3, N4

Pad printing is one of the most popular colour marking methods. It involves the application of ink with a flexible rubber pad from a previously prepared matrix.

We perform pad printing on products made of the following materials: plastic, paper, wood, glass, metal.

YouTube

SCREEN PRINTING

symbol: S0, S1, S2

Screen printing is a popular and very old method of direct printing on a product. The most important element of this method is a screen, through which, with the help of a squeegee, ink is squeezed. Depending on the material to be marked and the chosen logo, screens of different densities are used. The selection of the right type of paint is also crucial.

We perform screen printing on products made of the following materials: polyester, cotton, plastic, paper, wood, leather.

SCREEN PRINTING HEAT TRANSFER

symbol: F1, F2

Screen thermal transfer is an indirect printing method. The print is screen printed on transfer paper, then the paper is coated with powdered adhesive. The whole thing is activated in a heating tunnel. The print prepared in this way is transferred to the desired surface and then indented into the product using thermal transfer presses.

We perform screen printing thermal transfer on products made of the following materials: polyester, cotton, plastics, paper, wood, leather, jute.

DTF

symbol: C1, C2, C3

DTF is an indirect printing technique that transfers digital printing from film to product. The film is coated with powdered adhesive. The whole thing is activated in a heating tunnel. The print prepared in this way is transferred to the desired surface and then indented into the product using heat transfer presses.

We make DTF on products made of the following materials: polyester, cotton, plastic, paper, wood, leather, jute.

All markings
(Your Logo, www.youraddress.com)
presented on the products in this
catalogue are shown only for
the displaying marking possibilities
and informational purpose.

UV PRINTING

symbol: U0, U1, U2

UV is a modern and fast method of direct printing. The image is printed with special inks directly on the surface of the labeled gadget and then hardened with UV rays.

We perform UV printing on products made of the following materials: plastic, paper, wood, glass, metal.

SUBLIMATION

symbol: B1, B2

Sublimation is an indirect printing technique that involves printing graphics on sublimation paper and transferring it to the product using heat transfer presses. The ink permanently penetrates the structure of the material, making the print permanent and imperceptible to the touch.

Sublimation is performed on products made of the following materials: white polyester, sublimation-coated metal.

EMBOSSING

symbol: T1, T2

Embossing is a technique that involves imprinting a die in a material. The logo is embossed under high pressure and high temperature. The marking color and intensity depends on the properties of the material from which the product is made. To achieve the effect of color we use a special film, which is applied to the surface of the product and through it we press the die. The marking color then depends on the color of the film used.

We perform embossing on products made of the following materials: leather, PU eco-leather, veneers of various plastics.

DOMING

symbol: D1, D2, D3

Doming is a resin sticker that allows you to achieve an effect similar to a three-dimensional painting. A layer of polyurethane resin is applied to the printed sticker, which hardens.

We perform doming on products made of the following materials: plastic, paper, wood, glass, metal, leather.

EMBROIDERY

symbol: H

Embroidery is the embroidery of a desired design using thread. A very durable and elegant technique, it is commonly used in decorating fabrics.

We make embroidery on products made of the following materials: polyester, cotton, plastic.

NEW

360°

UV PRINTING UV360°

symbol: U3, U4

UV 360 is a modern method of rotary direct marking on products with cylindrical shape like bidons and bottles. Each product is fixed in the machine with special holders.

We perform UV printing on products made of the following materials: plastics, metal.

Fantastic5

Welcome to the world of **F5 (Fantastic5)**, a series in which, at the beginning of every month we present 5 completely new, **never-before-seen promotional gifts**.

The **Fantastic5** collection is a terrific source of gadget inspiration and a response to the needs of the demanding market. Every month we publish new gifts and share useful sales tools in the form of product presentations and a package of photos.

BRAND HERO

Who is MR. FANTASTIC?

The handsome guy who accompanies us on the occasion of subsequent product premieres. He is the BRAND HERO of the Fantastic5 collection.

*Did you know...*

Coloring requires the cooperation of both hemispheres of our brain, which has a positive effect on improving mindfulness, focus and memory. That is not all! Coloring stimulates alpha brain waves, thanks to which our body enters a state of relaxation, comparable to meditation. Coloring books, also for adults, are great against stress or blues.

The set includes crayons in 12 colors,
12 coloring pages.

Did you know...

The wide threads of the thermal mugs and bottles, make it possible to store liquids other than hot or warm drinks. Thermal bottles and mugs are also great reusable containers for soups and other liquid dishes. They maintain their temperature so that the dish can be consumed as a takeaway, without the need to reheat the food.

Did you know...

Borosilicate glass is more resistant to impact and breakage than traditional glass and does not react with most chemicals, making it an ideal material for food storage containers. Borosilicate glass is also more transparent than traditional glass, which translates into better visibility of the container's contents. A key advantage is that borosilicate glass is more resistant to temperature changes than traditional glass, meaning that the containers will not crack when exposed to heat.

VERA YOUNG

Vera Young candles are not only an elegant addition to the interior, but also a way to create a unique atmosphere. Each of them is carefully made from natural ingredients, which guarantees a long-lasting and clean burning. What's more, a Vera Young candle is an excellent gift idea that is sure to surprise and delight the recipient. By choosing Vera Young products, you are betting on quality, elegance and originality.

NEW

The unique combination of juicy lemongrass and spicy ginger creates an extraordinary atmosphere of relaxation and indulgence. Indulge in an escape from the hustle and bustle of everyday life and immerse yourself in an aromatic experience that stimulates the senses while creating a peaceful space for inner relaxation.

Vera Young Candles products are hand-poured. They are made from natural soy wax - they are 100% natural and organic. Thanks to the plant-based waxes, the candles are completely safe for health and do not contain any harmful substances.

A carefully created combination of unique fragrance notes: amber, incense and cashmere, form the heart of this extraordinary candle. In addition, notes of ginger, vanilla, cinnamon and delicate accents of tobacco leaves are incorporated. The result of this aromatic marriage is a candle whose fragrance evokes associations with a library atmosphere, filled with the scent of old, precious books. This is a unique sensory experience that transports you to the magical world of literature, wrapping the interior with subtle elegance.

The VERA YOUNG brand was born out of a love for unique fragrances and a desire to provide candles of the highest quality. We noticed the lack on the Polish market of brands that not only offer a wide range of fragrances, but also meet the expectations of people with a refined sense of smell, able to surprise at the same time with innovative compositions. What was once just a hobby for the brand's owners turned into something more after a few years.

From this passion and experience in creating candles for themselves and loved ones, Vera Young Candles was born. From the very beginning, the brand's goal was to evoke delight and enchantment, transporting each recipient to a better, aromatic world. Vera Young not only offers the highest quality products, but also introduces innovative and captivating fragrances that bring a unique atmosphere to customers' homes and inspire them to discover beauty in everyday moments.

NEW

A subtle blend of flowers and fruits with a noticeable leathery note. Juicy plum, intense pomegranate, romantic rose and delicate violet create a harmonious whole. In addition, sweet accents of vanilla and deep patchouli give this elegant composition a unique character. This unique scented candle will meet the expectations of even the most demanding lovers of aromatic sensations.

Move deep into the forest with an intense, powerful aroma. The head notes are dominated by pine and eucalyptus, creating a fresh and energizing experience. The heart composition is the pure scent of pine, which envelops you in forest freshness. In the base of the fragrance you'll find a combination of pine, cedar, delicate sandalwood and subtle hints of musk, which give the whole fragrance longevity and depth. It's not just the scent of forest wood, it's a journey into nature that saturates your home with the intense aroma of the forest, creating an atmosphere of peace and harmony.

HANNI | bees wax candles

Did you know...

The first candles were used at least 3,000 years ago. They were mainly used for religious ceremonies. Later, they were also used as a method of measuring time - the simplest method was to stick a piece of metal into the candle. As the wax around it melted, the metal falling on the plates signaled the passing of time.

2 candles in the set. Natural beeswax.

Humidifiers help to maintain optimal humidity levels indoors, which can relieve respiratory irritation and reduce the risk of infection. Particularly during the heating season, when the air is often excessively dry, a humidifier can help prevent nasal, throat and other dry air ailments.

Did you know...

The first evidence of yoga practice dates back to 2300-1500 B.C.E. And until 1937, women could not legally learn it. Sounds incredible, doesn't it? Today there are over 100 different styles of yoga. It is considered an effective way to maintain the harmony of body and spirit and to fight depression.

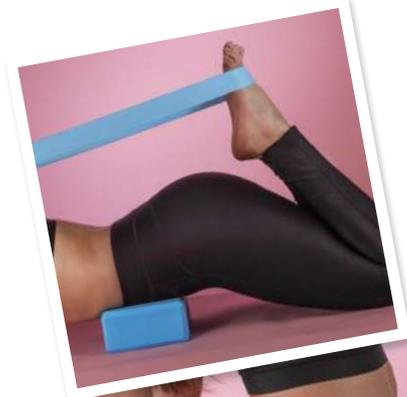

Set contains: yoga block, belt and massage ball.

20049

KOLI | rPET blanket

The 2-in-1 product, or pillow and blanket, is a practical solution for travellers who enjoy outdoor activities, but also for those who value comfort and functionality in their own home. The product is perfect as a car accessory - allowing you to rest comfortably while travelling or camping, or for spontaneous relaxation in the open air.
P.S. A must-have gadget for a spontaneous afternoon nap ;-)

23,21 €

Charti

It is not the best idea to wash paper. Surely, you know that. But what you probably do not know is that our paper bags are not afraid of getting wet. With synthetic latex impregnation, the cellulose that is used to manufacture them does not lose its properties even after laundering. The material which our bags and backpacks are sewn of is often referred to as leather for vegans because its production does not require the use of any ingredients of animal origin.

POWER BANK WITH SOLAR PANELS

How does it work?

Solar-powered products have a built-in solar panel that converts the energy from the solar light rays into electricity.

What are the advantages of solar energy?

It is full of benefits! Here are some reasons why it's so amazing:

- Sunlight is a renewable energy source - meaning it will never run out.
- It is easy to generate - solar panels are all you need and they do not take up much space.
- It is quiet – photovoltaic or solar cells do not make any noise at all, and they convert sunlight into usable electricity. Thanks to this, we can enjoy peace and quiet!
- It does not pollute the environment. Solar power plants do not emit harmful substances into the atmosphere when they are being used or charged.

mAh miliampere-hour

mAh is a miliampere-hour, the unit for batteries capacity. The value in mAh means how many energy can be stored. Power Banks with higher mAh capacity can recharge more devices.

USB ports the more, the better

Power bank may have more than one USB output, which allows you to charge multiple devices simultaneously. Each output may have different amperage dedicated for different mobile devices.

Metal ball pens

Metal pens are popular as an advertising gadget because of their **durability, elegant appearance and the possibility of personalization.**

**Not just an engraving anymore!
Add some color to your business!**

Modern technologies allow marking selected models of metal pens with 4-color printing, which adds a new colorful dimension to personalization.

Notebooks

Always fashionable

3 REASONS WHY IT'S GOOD TO HAVE A PAPER NOTEBOOK

- note your thoughts and observations without distracting yourself with electronic devices
- handwritten notes give better results and allow better remembering of information,
- a paper notebook will not run out of battery power or break down when you drop it on the ground

Bottles

A source of hydration at any time!

UV360 marking

Our bidons and bottles are not only practical gadgets, but also guarantee high quality and innovative solutions. Here's what you should know about our products:

- **BPA-free:** All our bidons and bottles are free of harmful BPA, taking care of your health and safety.
- **Lock types:** Three types of locks are available, allowing for easy use - just twist, pull or push.
- **Lock tightness:** We make sure our products are practical and safe, so every bottle and bidon has a leak-proof closure to eliminate the risk of leaks.
- **Convenient handle:** Some of our products are equipped with a convenient handle for easy carrying and comfortable use.
- **NEW! UV360 Marking:** In this edition of the catalog, we have introduced innovative UV360 marking, which is the ability to print all around the item, giving our bidons and bottles a unique character.

- Approximate values, measured from initial temperature 100°C to end temperature 40°C. During this period the mug was not opened, measurements were made in room temperature.
- Vacuum between the walls.

We care not only about functionality, but also about attractive design. **Our thermal mugs and bottles are available in a variety of designs and colors, allowing everyone to find something for themselves.**

All our products are **free of harmful substances** and **meet the highest safety standards.**
Easy to clean: simple to clean and convenient for daily use.

Umbrellas

Polyester Pongee, superman among fabrics!

- high strength due to the use of fine threads, abrasion and fading resistance
- resistant to shrinkage and stretching, water-resistant and fast-drying
- easy to print, irrespective of the printing technique,
- recyclable
- has a silky-like finish, which gives the umbrella a more elegant and luxurious look.
- lighter and softer to the touch, which may affect the comfort of use
